Summary — Experienced Mobile Developer with over 5 years of expertise in designing, developing, and deploying high-quality mobile applications for both Android and iOS platforms. Proficient in creating user-friendly, scalable, and efficient apps using technologies such as Flutter, Java, Kotlin, and Swift. Strong command of cross-platform development and native development tools, with a deep understanding of mobile architecture, UI/UX design principles, and API integration.

Experience

PT. Appfuxion Indonesia   **Sept 2023 – Sept 2024**
Mobile Developer
– Build user interfaces of web apps and mobile apps from scratch using Flutter
– Implementation of responsive layout from web to mobile using width and height threshold method
– Implementation of business logic using a provider
– Collaborated with UI/UX designers, backend, and frontend developers
– Integrated APIs with the web applications using Restful Web Services
– Implemented microservice in Java Spring Boot
– Maintained version control systems like Git for source code management
– Created back-end services for data manipulation and business logic using Java Spring Boot

PT. Majoo Indonesia   **Aug 2021 – Jul 2023**
Sr. Mobile Engineer
– Developed mobile application using various technologies such as Dart ,Java, and Swift
– Created user interfaces for applications on both iOS and Android platforms
– Integrated backend services with mobile applications to enable features like push notifications and data synchronization
– Engaged actively in cross-functional teams to develop innovative solutions for complex problems
– Maintained source code repositories by committing changes regularly according to best practices
– Resolved technical issues related to mobile application development and deployment processes
– Tested the performance of mobile applications on multiple devices to ensure compatibility across different hardware configurations
– Optimized application performance for both speed and efficiency across multiple device types
– Participated in sprint planning sessions with other team members
– Assisted in creating detailed documentation related to mobile application development processes

PT. Berca Hardayaperkasa   **Sept 2020 - Aug 2021**
Mobile Engineer
– Developed mobile application using various technologies such as Dart ,Java, and Swift
– Created user interfaces for applications on both iOS and Android platforms
– Integrated backend services with mobile applications to enable features like push notifications and data synchronization
– Modified existing software to correct errors, adapt to newly implemented hardware or upgrade interfaces.
– Maintained source code repositories by committing changes regularly according to best practices
– Resolved technical issues related to mobile application development and deployment processes.
– Optimized application performance for both speed and efficiency across multiple device types

PT. DOT Indonesia   **Sept 2019 - Aug 2020**
Junior Mobile Engineer
– Developed mobile application using various technologies such as Dart ,Java, and Swift
– Created user interfaces for applications on both iOS and Android platforms
– Integrated backend services with mobile applications to enable features like push notifications and data synchronization
– Modified existing software to correct errors, adapt to newly implemented hardware or upgrade interfaces.

Freelance   **Sept 2018 - Present**
Mobile And Web Developer
– Provided custom mobile and web application development services to startups
– Proficient in Flutter, Kotlin, Java, Laravel, Java Spring boot
– Successfully delivered projects in point of sale, e-commerce and healthcare.

Education

STMIK Triguna Utama
Bachelor of Science in Informatics Engineering

Skills

Mobile App Development

– Flutter, Java, Kotlin, Swift, Objective-C

Web App Development

– HTML, CSS, JavaScript

UI/UX Design

– Material Design (Android)
– Human Interface Guidelines (iOS)
– Figma, Adobe XD, Sketch (for prototyping)
– Responsive and Adaptive Design

Backend and API Integration

– RESTful APIs
– JSON, XML Parsing

– Firebase, Google Cloud (for backend integration)
– Authentication (OAuth, Firebase Authentication)

Version Control and CI/CD

– Git, GitHub, GitLab, Bitbucket, Vercel

App Performance and Debugging

– Android Studio Profiler, Xcode Instruments
– Crash Management (Sentry, Crashlytics)
– Unit Testing, UI Testing
– Profiling for Performance and Battery Life

Agile Development and Collaboration Tools

– Jira, Trello, Slack, Microsoft Teams (for team communication)

Soft Skills

– Ability to analyze and resolve issues effectively.
– Comfortable working with cross-functional teams including designers, backend developers, and project managers.
– Efficient in handling multiple projects and meeting deadlines
– Ability to communicate technical concepts to non-technical stakeholders.
– Quick to learn new tools, languages, and technologies as they evolve.
